ods listing close;

*options(doc='Help') will print the help file in your log.;
ods tagsets.ExcelXP file = 'c:\temp\class.xls' style = sasweb options(doc='Help');

*if you dont code var statement it will create a spreadsheet with all columns;
proc print data = sashelp.class;
run;
*ods tagsets.excel xp close;

*specify your var statements to limit the columns;
proc print data = sashelp.class;
  var name--age;
run;
*ods tagsets.excel xp close;

*customize each of your columns by choosing a style;
proc print data = sashelp.class;
var name--sex;
var age / style(column)={tagattr='@'};
var height / style(column)={tagattr='#, #.00'};
var weight / style(column)={tagattr='$#, ##.00'};
run;

ods tagsets.excel xp close;
*apply the ods close statement based on your need, if you apply above
*you will get a spreadsheet with three workbooks.;
