

How can I get a new column like `_N_ obs_num` in my SAS table using PROC SQL?

```
DATA class_with_obs_num_data ;  
  SET sashelp.class ;  
  obs_num = _N_ ;  
RUN ;  
PROC PRINT ;  
RUN ;
```

is the same as

```
PROC SQL ;  
  CREATE TABLE class_with_obs_num_sql AS  
  SELECT *, monotonic() AS obs_num  
  FROM sashelp.class ;  
QUIT ;  
PROC PRINT ;  
RUN ;
```
